EDI provides an efficient means for our trading partner to submit invoices for payment. Receipt of the invoices, as well as an indication of any EDI-related processing problems that occur, will be conveyed back to the vendor via Functional Acknowledgments (997). The 'FAs' will be automatically sent back for each inbound document.

Once received and processed through the EDI systems, the invoices are transferred to the Accounts Payable processes. If any errors occur within the Accounts Payable systems, an Application Advice (824) will be sent to the vendor and the invoice will not be paid. The error(s) will then have to be rectified, and the corrected invoice(s) retransmitted to CVS. ONLY the corrected invoices should be retransmitted.

IT IS MANDATORY TO TRADE THE APPLICATION ADVICE (824) WHEN CONDUCTING ELECTRONIC INVOICING.

AP Invoice Matching System Criteria...

The Accounts Payable department utilizes a matching system that performs a detailed, systemic comparative match by line item between a supplier's EDI invoice and the internal CVS PO and receipt. The program compares, for each item, units received against units billed, and unit price on the PO compared to unit price on the invoice. In order to accomplish this detailed match, CVS re-computes the extended cost for each line item as follows:

Units Calculation:

(Cases, dozens, each) * Pack Quantity = Number of Pieces Shipped

Cost Calculation:

EDI Invoice Cost / Pack Quantity = Piece Cost

Extended Cost Calculation:

Number of Pieces Shipped * Piece Cost = Extended Cost

Obviously, matching discrepancies arise when the above calculations do not match the invoiced amount per line item. Discrepancies such as these will result in payment shortages due to invalid data on the EDI invoice. The invalid invoice information, primarily centered around case pack errors, can cause significant delays in a supplier receiving proper payment. In addition, additional workloads at CVS and in your company's credit department are created. It is in both of our companies' interest to get the EDI invoice information correct.

This affects not all of our suppliers, however, we ask each of our suppliers to review their EDI invoice data elements and ensure the invoiced amount per line item on an EDI invoice is supported by the above calculations. If not, we ask that you make the appropriate correction(s) immediately. Failure to do so will result in payment discrepancies. If there are any questions regarding the correction of EDI invoices, please contact the EDI Department by email at EDIAPMailbox@cvs.com.

Note that it is MANDATORY to trade the Application Advice (824) when conducting electronic invoicing.
