

CVS has teamed up with CommerceHub to enhance their drop-ship program

Drop-ship programs managed by CommerceHub enable retailers to meet delivery expectations and improve customer experience.

CommerceHub has the technical know-how and drop-ship expertise to connect you to our network quickly and support your growth with the tools and services you need to be successful.

Order Management	Reporting	Support
<ul style="list-style-type: none"> Quickly load required inventory data Receive orders in the format you choose Send compliant confirmations, cancellations, and inventory updates Printable CVS-branded packing documents for a seamless customer experience 	<ul style="list-style-type: none"> Receive automated alerts for late and soon-to-be-late orders Track order status and review order history Gain insight into valuable performance metrics to help improve your business Create comprehensive searches to track your business 	<ul style="list-style-type: none"> Reach out to customer support teams 24/7 Gain access to on-demand, interactive training content through CommerceHub University and HubHelp Use detailed technical documentation to help meet your retailer's expectations

Two Ways to Connect

CommerceHub gives you the flexibility to connect in a way that suits your business

CommerceHub Web App (Browser Connection)

Easy and cost-efficient, this is an ideal starting point for growing your order volumes

The CommerceHub web app provides you with all the tools you'll need for order fulfillment, and provides access to powerful reporting capabilities to improve your business.

Automated Data Exchange (Integrated Connection)

Process high order volumes with an automated connection

Automate and accelerate data exchange using industry standard file formats and communication protocols while maintaining access to powerful reporting capabilities in the CommerceHub web app.

Next Steps

CommerceHub will reach out to you with next steps to help you make the most of your CVS connection.

CommerceHub is a distributed ecommerce network connecting supply, demand and delivery that helps retailers and brands increase sales by expanding product assortments, promoting products on channels that perform, and enabling rapid, on-time customer delivery.
