

Doing Business with CVS Caremark

In order to support our efforts to establish a good working relationship with all our suppliers, the Supplier Diversity Program process requires all suppliers and service providers seeking new or continued business opportunities to complete the Supplier Diversity Registration Portal for pre-qualification. Please click on this link to begin the process. www.cvssuppliers.com/supplier-diversity

Completing the Supplier Diversity registration will:

- Provide an updated record for your company in our supplier database
- Provide an updated record of your company's certification status
- Support our efforts to identify current suppliers as possible resources for second-tier opportunities
- Expedite the review of your company's products/services and capabilities

The Supplier Diversity registration should be completed and accompanied with the following information when it is submitted:

- Current diverse supplier certificates or letters of certifications
- Sales catalog or company brochure
- Product profile
- Capability statement

CVS Caremark strives to provide opportunities to all qualified suppliers. This process was designed to create and promote fair and equal opportunity for all. Completion and submission of the registration does not entitle any company to an opportunity with CVS Caremark.
